Pipetite® for pipe penetrations

At Aseptconn, we understand the importance of sealing your installations. That's why we offer you the Pipetite® product range.

Pipetite® is a reference brand in the field of sealing solutions, specifically designed for industries where hygiene and safety are paramount. Our products are ideal for the food processing, pharmaceutical, and chemical industries, providing perfect sealing for pipe penetrations while meeting the highest standards.

Key Features

- ✓ **High-quality materials:**
Made from flexible, durable and resistant silicone.
- ✓ **Adaptability:**
Modular design that easily adapts to various pipe diameters
- ✓ **Easy installation:**
No specific tools required, reducing installation time and costs.
- ✓ **Hygiene standards:**
Compliant with international standards for demanding hygienic environments

Advantages

Simplified maintenance:

·Facilitates cleaning and reduces the risk of cross-contamination.

Optimal sealing:

Prevents water, dust, or contaminants from entering critical areas.

Cost reduction:

Less downtime and maintenance thanks to easy installation and care.

Durability:

Withstands difficult conditions and ensures a longer service life.

Product Range

Pipetite® Standard:

For general installations, offering a reliable sealing solution for most applications.

Pipetite® ReBoot:

Ideal for installations where pipes need to be easily removed or reinstalled. Perfect for already existing piping systems.

Pipetite® Grommet

For cable and pipe penetrations with smaller diameters. Also suitable for panel entries.

Pipetite® Flat

Sealing solution for installations with limited space, where a flat surface is required.

Why Choose Pipetite® products?

Pipetite® guarantees uncompromising sealing, easy installation, and exceptional durability. Our products are designed for the most demanding industries and ensure safety, hygiene and performance.
