

Repair and Refurbishment of Tanks

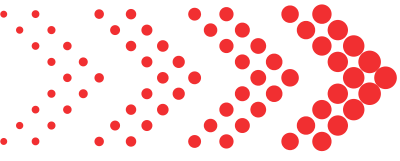

About us

Aseptconn is a leading supplier of components, products, software, and systems for sterile liquid technology, primarily serving the pharmaceutical and biopharmaceutical industries. With innovative products and expert guidance, Aseptconn helps its clients sustainably enhance their processes. Its extensive portfolio and diverse range of services make it the preferred supplier for many renowned international pharmaceutical companies.

Service Description

We pride ourselves on anticipating potential issues related to the maintenance of your production lines. That's why we offer a regular and preventive maintenance service, tailored to your equipment and specific needs.

Our experts are available for an on-site visit to evaluate your equipment and plan maintenance interventions with complete peace of mind. Thanks to our responsiveness and expertise, we ensure fast, reliable, and high-quality services to maintain the optimal performance and durability of your installations.

Maintenance Service

Why is it essential to regularly maintain your installations?

Over time, equipment such as tanks, circulation pumps, and filling funnels experience wear and tear from use. This progressive degradation can lead to several critical issues, including:

- Surface condition deterioration, compromising equipment quality.
- Increased risk of contamination, affecting product safety and compliance.
- Specific corrosion, which may weaken your installations.
- Degradation of surface characteristics, reducing performance and durability.

Regular maintenance helps prevent these risks, ensures the reliability of your equipment, and extends its lifespan while maintaining the safety and compliance of your production processes.

What do we do?

To prevent issues related to the wear and tear of your installations, we offer a complete maintenance service.

- **Quick on-site evaluation:** We respond promptly to inspect the condition of your equipment.
- **Personalized advice:** We recommend the best solutions for effective refurbishment.
- **Tailored planning:** We develop a clear and structured work plan, taking into account your time constraints.

Maintenance Service

How do we proceed?

Our maintenance service includes a wide range of services to ensure optimal results:

- Travel expenses covered: We take care of the costs associated with on-site maintenance.
- Inspections and certifications: We provide all necessary documents during the refurbishment, including:
 - Welding log in case of repairs.
 - Roughness checks and endoscopic inspections carried out by our qualified staff.
 - Certificate 2.2 for the work completed.
 - Material certificates verified by mass spectrometry.
- Maintenance and refurbishment: We use advanced techniques to extend the lifespan of your equipment:
 - Polishing and electropolishing of product-contact surfaces.
 - Bringing equipment back into compliance in case of defects.
 - Guaranteeing surface conditions (Ra) that meet your requirements, ranging from mirror finish to roughness of 0.8 μm .

We adapt to your needs and quality requirements to ensure optimal and sustainable maintenance of your installations.
